Built to Last!

Centralized mail and package delivery equipment, such as Florence Cluster Box Units (CBU) and 4C mailboxes and parcel lockers help builders and design professionals alike provide a green delivery method which is built to last. Centralized delivery locations mean multiple deliveries per stop so less fuel is consumed overall; resulting in lower carbon emissions. Using durable powder coating methods which do not contain VOCs, Florence products resist weather deterioration and therefore also reduce the need for regular replacement. These quality products not only protect resources, but reduce costs due to their extensive product life. If however, they have come to the end of their long life, all product materials are recoverable for recycling.

Dedicated to Reduce - Reuse - Recycle!

Florence Corporation reduced its factory carbon footprint by implementing advanced process technology in our powder coat ovens and product washing units. These actions were recognized by the Kansas Department of Health and Environment (KDHE) with a Pollution Prevention Award during their 2009 Kansas Environmental Conference.

We are also dedicated to maintaining a successful recycling program which ensures the appropriate reuse and/or reprocessing of our aluminum, corrugate, powder paint, wood, and steel materials; as well as our office waste such as paper, toner cartridges and batteries. In addition, Florence has a team of committed employees who vigilantly review all of our systems for continuous improvement and new opportunities for reduction in raw materials and/or recycling of used materials.

Florence centralized mail and package equipment products are manufactured in Manhattan, Kansas, and contain:

- 30% post-consumer recycled content per weight
- 20% pre-consumer recycled content per weight

Material Safety Data (MSDS)

MSDS sheets are not required for any Florence products and packaging, as they are exempt from the labeling and material safety data sheet requirements as provided under Title 29 CFR Part 1910.1200; nor do the product, or their packaging, contain any asbestos or PCBs.

UL Certified as ISO Manufacturer

Florence is extremely proud to be the only mailbox manufacturer who is both an ISO 9001:2015 and ISO 14001:2015 Underwriters Laboratory audited manufacturer. Regular audits by an internationally recognized third-party allow us to continually re-evaluate, monitor, and adjust our environmental management system; ensuring we remain efficient, safe, and good environmental stewards. Voluntarily holding ourselves to these high standards demonstrates our commitment to providing a quality product and dedicated customer service.
